

Dear

for your information please note our latest product information concerning

REFUELLING NOZZLE AVN042

The Liquip AVN042 have been design as easy to operate nozzle for delivery of fuels. Unlike normal nozzles, it is equipped with “power assist” dashpot operation to make it as light as a service station bowser nozzle.

This robust, modern and light weight manual shut-off nozzle is suited for high pressure for flow rates up to 450 L/min., only 50 kPa pressure drop at 300 L/min with 32mm spout.
Weight : 2,5 kgs

Pressure balance design provides for small and constant finger force on the trigger no matter what the pump pressure. The ease of operation allows for accurate fine top-up without any surging and splashing.

Type : AVN042

Price : A\$ 416,- net / each

All accessories are sold separately :

GKG25, 25mm dust cap c/w chain	A\$ 44,94
