

Dear

for your information please note our latest product information concerning ROLL OVER SENSOR as follows.

The roll-over sensor minimises the risk of electrically ignited fires occurring in tanker accidents involving roll-over. Mounted across the chassis, in event of an rollover an output from the Roll-Over-Sensor shuts off the vehicle battery isolating switch and therefore isolates electrical power to the batteries.

Every tanker should be equipped with this safety equipment.

Type : Roll-Over-Sensor RS305

Price : A\$ 348,02 net ex-works Sydney

Delivery time : ex-stock available

On request we will send you further informations on this.

Best regards
