

**IPT Hose Reel
330-500 mm**

ER 40 Hose Reel

Configurations

Electric drive

Hydraulic drive

Capacity

Hose sizes	Hose lengths (meters)	
	40-01 (500 mm)	40-02 (330 mm)
1"	60	45
1 ¼"	50	35
1 ½"	40	25
2"	30	12

Specifications

Reels can help eliminate unsafe and cluttered work areas, as well as protect the hose from damage. Hose reels can also save time by keeping the hose untangled, eliminating the need to roll them up by hand. Hoses that are improperly stored and cared for can kink and crack, causing leaks and loss in pressure, while hose can become weakened or frayed.

IPT's drum style hose reel range adapts to a variety of drive mechanisms. Drum widths of 500 mm (ER 40-01) and 350 mm (ER 40-02) accommodate numerous hose sizes and lengths.

Features

- Built for heavy-duty applications that demand extra rigidity
- Drum storage of collapsible hose avoids damaging kinks for longer hose life
- Can be produced also in hydraulic or electric rewind configurations
- Suitable for industrial applications where longer length of hose is required

Other

Flow Range	130 lt/min (max) (with 1" nozzle)
Reel Pressure	12 bar (max)
Hose Pressure	16 bar (max)
Temp. Range	-10° C +60° C
Connections	2" (reduction can be applied)
